

## Environmental Policy Statement

At CloudCo Solutions, we recognise our responsibility to minimise our environmental impact and operate sustainably. As an environmentally conscious tech recruitment firm we work in serviced office space and we are proud to support green practices in our day-to-day operations.

### Our Commitments:

- We operate from shared office spaces that prioritise sustainability, including:
  - **Efficient lighting and heating systems**
  - **Recycling and food waste programmes**
  - **Use of renewable energy where available**
- We adopt a **digital-first approach**, minimising paper use and reducing waste.
- We promote **sustainable commuting and remote work**, limiting unnecessary travel and encouraging the use of public transport, cycling, or walking.
- We dispose of IT and office equipment responsibly repurposing it at Saint Martin's School on the Kibagare Slum in Nairobi, Kenya and we aim to reduce our energy consumption through efficient use of devices and cloud services.
- We comply with all relevant **UK environmental legislation** and seek to work with suppliers and partners who share our commitment to sustainability.

While our footprint is small, we believe in making a positive impact through responsible choices and by supporting greener ways of working—both within our team and across our network.
